Attitude is important, says Mounika who is fighting her battle against glaucoma

Triumph the odds - Our vision rehabilitation student clients make us proud

A solution to constant watering of the eye

V Rama Murthy, 72, from Hyderabad, lost his vision in the left eye at age 25 following untreated redness and watering of the eye. In his mid thirties, he experienced similar symptoms in his only seeing eye. He immediately consulted some local doctors. "I was prescribed glasses and some drops, which improved my vision, but persistent redness and watering of the eye would lead to severe bouts of headaches. The problem worsened with time, making me dependent on others for my day-to-day tasks," says Mr Murthy.

On the advice of an acquaintance, he consulted Dr Milind Naik at LVPEI who performed a surgery to clear the blockage in the tear drainage pathway in his nose. The immediate result was 60% reduction in the watering of the eyes. Thereafter Dr Sidharth Dixit operated him for cataract. "My vision has improved and I can now move around independently. My experience at LVPEI has been just excellent and I am touched by the humble behaviour of the doctors and other support staff here," concludes Mr Murthy.

Excellent Training Experience

Hi Dr Maneck,

I just got home to Chicago and wanted to say thank you, for a wonderful month's training. Everyone was so warm and welcoming, and really invested in my learning experience. I had a great time, learned a lot, and got to know you all, which was an added bonus.

Joshua Z Warren, MD, MBA

Medical Resident, Aurora Health Care

The Perelman School of Medicine, The Wharton School, Philadelphia

(Joshua completed a one-month Zeiss training program at GMR Varalakshmi campus, Visakhapatnam in April 2017).

I would like to appreciate Optometrist Kiranmayi Ch for the way she did my check-up and explained everything to me. I am sure that her diligence, determination and dedication will make her very successful in her career. May God bless her.

Sampa Sarmacharjee

Dear Dr Sangwan and Team,

I would like to thank you all for the care during our stay at L V Prasad Eye Institute for the Cornea Transplant surgery of my mother Mrs Krishna Nangia on 12 May 2017. We are already through from the first "risk zone" of surgery with your great care and hope for smooth sailing over the next 3 months. God bless you all for the service that you do.

Best regards,
Lasit Nangia
