

Diploma in Eye Health Management 2023

Course Objective

To impart training in comprehensive eye health management and develop managers who can efficiently and effectively manage eye care services at both the secondary and tertiary levels of care.

Course Structure

The one-year program comprises five modules. Each module begins with classroom-based theory lessons, followed by related practical training at a tertiary or secondary centre. Experienced faculty take the classes, some of whom serve as mentors during the internship.

Course Outline

Module 1: Introduction to the Course (1 Month)

- Structure and functions of the eye
- Common eye conditions
- Language and communication
- Basic principles of hospital management
- Observation visits to a tertiary eye hospital, a rural eye hospital, vision centres and a general hospital

Module 2: Management of Clinical Services (Two Months)

- Outpatient services
- Inpatient services
- Operation theatre management
- Patient counselling

Module 3: Management of Support Services - I (Two Months)

- Electronic Medical Records Department
- Pharmacy, opticals & cafeteria services management
- Quality management
