Learning Objectives

Day 1 (Feb 13)

- Observe near-live surgeries and fresh cadaver dissection performed and narrated by leading experts to learn the intricacies of periorbital and facial aesthetic surgeries.
- Observe and interact with experts explaining live facial neurovascular anatomy, and performing live botulinum toxin and filler injections for common periocular indications.
- Participate in the Injectable Workshop and learn periocular toxin and filler injection techniques on life-like silicone models with direct guidance from experts.
- Participate in the Facial Photography workshop with experts passionate about transferring their photography tips and tricks.

Day 2 (Feb 14)

- Stay up to date with concepts of facial aging, periocular hills and valleys, facial photography, tarsal plate show, and negative vector.
- Sharpen your surgical skills in periocular surgeries such as cosmetic ptosis, advanced blepharoplasty, canthoplasty, asian eyelid surgery, and browlift.
- Understand decision-making in facial aesthetic surgeries like fat grafting, rhinoplasty, aesthetic orthognathic surgeries, midface lift, facelift, and neck rejuvenation.
- Learn from real-life case presentations generating cross-specialty opinions.
- Master eyelid reconstruction, aesthetic orbital decompressions, and managing complications.
- Enjoy the curated Keynote lectures, expert presentations with QnA sessions, entertaining debates, and relaxing artistic activities.

Day 3 (Feb 15)

- Deepen your knowledge about periocular and lower facial botulinum toxin injections, periocular and perioral fillers, and thread lifts.
- Explore a 360° approach to oculofacial aesthetics by learning about skin lasers, bio-fillers, and newer regenerative therapies that offer precision and safety.
- Be inspired by practice-enhancing talks on photography, use of social media, practice building, and management of aesthetically difficult patients.
